

ILLUSTRATION 8-E

Approx 54 MYA as the Chicxulub Antipodal Hot Spot starts making islands at East Timor.

ASIA

Moving North and a little bit west due to the Coriolis effect.

Land pushed up by the "blow" as it makes a tight turn. It will be part of the Malay Peninsula, Sumatra & Java

The top of the tail starts to push up small islands as it makes a tight turn

Sunda Trench formed by the tail as it pulls away in its turn.

Chicxulub Antipodal Hotspot starts making islands
